# Workcloud Inventory Visibility Frequent Count

You need accurate inventory that's visible to your customers across all channels. But, how? Achieve it by supporting wall-to-wall inventories with more frequent, guided cycle counting. Eliminate ineffective home-grown counting that's often inaccurate and optimize cycle counting with Zebra Inventory Visibility Frequent Count.
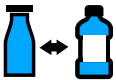

Cycle Count with a Solution You Can Trust for Accurate Results

Conduct automated, directed counting based on your needs

Target specific areas of your store

Alter based on inventory type, urgencies, seasonal changes and more

Access info quickly using the integrated analytics dashboard with filters
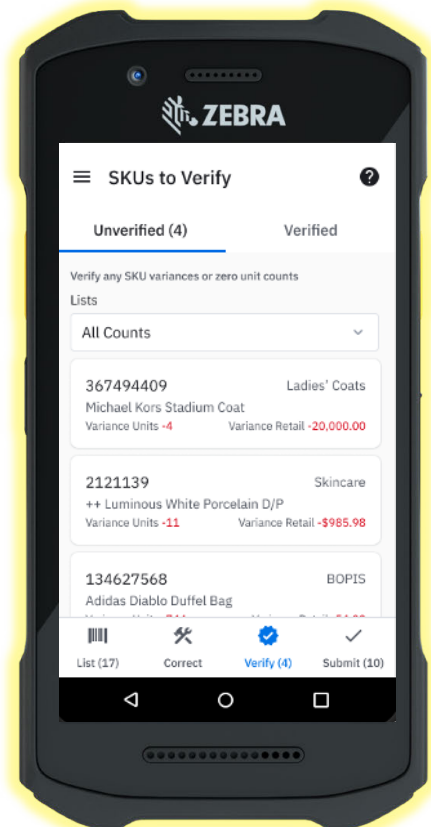

Eliminate guesswork with secure, data-driven confirmation that updates immediately

Capture accurate data using tailored software that fits your needs

Provide visibility to store, region and corporate-level users

See How Others Regained Control of Increasingly Complicated Inventory Events With Zebra

Who

An international grocer that conducted monthly, full-store inventories

Challenge

Move from multiple service providers to reduce cost and increase process synergies

Solution

By implementing Zebra Inventory Visibility, the grocer was able to:

- Reduce labor costs and increase productivity by 30%

- Shift from monthly to quarterly full-store inventory counts due to increased cycle counting accuracy

- Reduce shrink and gain customized variance reporting down to the item level if needed

- Give leadership a detailed view of monthly inventory valuation, yearly comparisons for holiday periods and flag possible issues at the regional / global levels

Make Cycle Counting Easy and Accurate with Zebra

With a powerful solution you can utilize directly on your Zebra Android devices or on devices shipped to your locations, empower your associates to manage inventories accurately and elevate the customer experience across all channels.

Transform your cycle counts and save up to 50% on inventory counting costs with Zebra Inventory Visibility Frequent Count.

Experience the Difference

Metric	Ad Hoc Cycle Counting Methods	Cycle Counting with Zebra Inventory Visibility™
Accuracy	Time-consuming and prone to human error	Eliminate inaccuracies and miscounts with automated scanning and in-progress auditing
Control	Limited visibility into processes and count completion, lack of analytics to forecast what needs counting	Target and schedule what areas to count and how frequently, validate results and provide broad visibility in real time
Efficiency	Current processes can result in low productivity	Proven retail best practice processes help maximize efficiency
Real-time Visibility	Results must be manually logged, verified and validated, then pushed via systems for visibility	Real-time counting results can be validated and automatically visible to authorized groups at all levels
UX/UI – (User-friendliness of Solution)	Cumbersome, rudimentary processes results can be misread, incorrectly recorded or lost	Intuitive and software-directed solution provides a guided process for easy adoption and more accurate use
